

MOTOTRAK
motorcycle tracking system

SmarTrack have fully developed MotoTrak, an innovative product that tracks Sports, Naked, Classic, Prestige, Custom, Economy Scooter and Dispatch motorcycles.

MotoTrak uses the Internet and is the pioneer of this new tracking era so you the customer can benefit from peace of mind that your Bike (asset) is closely monitored. Monitoring your motorcycle has never been so easy, you can log on...fix a Geo-fence around it and if it moves you will be email alerted to the fact!

This is ideal for the winter months when it's stored from the salted roads. It will also tell you its position every 2 hours and every 1 to 2 minutes while riding! This system is set up to show 1 minute positions when being ridden, showing location, time, speed and start/stop reports.
